Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with <i>Government Auditing Standards</i>	38-39

INTRODUCTION

The North Little Rock Waste Water Utility, hereafter referred to as the "Utility" is pleased to present its financial report for the years ending December 31, 2018 and 2017 developed in compliance with Governmental Accounting Standards.

Mission

The mission of the Utility is to provide safe, low cost, high quality sewer service to the citizens of North Little Rock, Arkansas and other areas as directed. This service in general includes the collection, treatment and disposal of the treated water into the Arkansas River in an environmentally sound matter.

Summary of Organization

The Utility was established by the North Little Rock City Council in 1962. The City Council appointed a five member commission to oversee its operations. Each commissioner is appointed for a five year period, with any reappointment approved by the City Council. The commission meets in open public session on the second Tuesday of each month. The Utility's day to day operations are managed by a professional Director with assistance from the senior management. The Utility has no taxing power. Operational and maintenance costs are funded from customer fees and charges. At the end of 2018, the utility provided service to approximately 39,900 customers. The acquisition and construction of capital assets are funded by customer revenues, contributions from developers and sewer improvement districts and from construction loans. The Utility maintains and operates four treatment plants, 74 pump stations and hundreds of miles of sewer lines. As of December 31, 2018, the Utility had 87 full time employees dedicated to providing sewer service to the customer base.

Responsibility and Controls

The Utility has prepared and is responsible for the financial statements and related information included in this report. A system of internal accounting controls is maintained to provide reasonable assurance that assets are safeguarded and that the books reflect only authorized transactions. The internal accounting controls are evaluated on an ongoing basis by the Finance Administrator. Independent external auditors also consider certain elements of the internal control system in order to determine their auditing procedures for the purpose of expressing an opinion on the financial statements.

Management believes that its policies and procedures provide guidance and reasonable assurance that the Utility's operations are conducted according to management's intentions and to a high standard of business ethics. In management's opinion, the financial statements present fairly, in all material respects, the financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America.

Audit Assurance

The unqualified opinion of our independent auditors, EGP, PLLC, is included in this report.

Independent Auditor's Report

North Little Rock Waste Water Treatment Committee North Little Rock Waste Water Utility

Report on the Financial Statements

We have audited the accompanying financial statements of North Little Rock Waste Water Utility (a component unit of the City of North Little Rock, Arkansas), which comprise the statement of net position as of December 31, 2018 and 2017, and the related statements of revenues, expenses and changes in net position and cash flows for the years then ended December 31, 2018 and 2017.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of North Little Rock Waste Water Utility, as of December 31, 2018 and 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the financial statements present only the North Little Rock Waste Water Utility and do not purport to, and do not, present fairly the financial position of the City of North Little Rock, Arkansas, as of December 31, 2018 and 2017, the changes in its financial position, or, where applicable, its cash flows for the

years then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison schedule, pension funding progress, changes in the net pension liability and related ratios, contributions and changes in other post-retirement benefit liability and related ratios on pages 4 through 9 and 33 through 36 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the North Little Rock Waste Water Utility's financial statements as a whole. The introductory section and schedule of operating expenses on pages 1 and 37 are presented for purposes of additional analysis and are not a required part of the financial statements.

The schedule of operating expenses is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

The introductory section has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we also issued our report dated March 30, 2019, on our consideration of North Little Rock Waste Water Utility's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering North Little Rock Waste Water Utility's internal control over financial reporting and compliance.

EGP, PLIC

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section presents management's analysis of the Utility's financial condition and activities for the year. This information should be read in conjunction with the financial statements.

Financial Highlights

Our current rate ordinance was adopted on October 26, 2015 and it includes rate adjustments effective on January 1st of the years 2016 through 2020. The rate of \$17.01 for a minimum usage of 400 cubic feet and \$4.88 per 100 cubic feet of usage after 400 was effective for the January, 2018 usage which was billed in February. The rate which was in effect for the January, 2018 billing for the December, 2017 usage was \$4.48 per 100 cubic feet with a minimum amount of \$16.36 for 400 cubic feet. There is a minimum charge of four 100 cubic feet for all customers.

The Utility was able to increase its cash and certificates of deposit balance by around \$4,700,000 during 2018. The Utility was able to invest excess funds in three new certificates of deposit during the year.

The Statement of Net Position as of 12/31/18, includes an insurance receivable. In late October, there was a fire at the Utility's Faulkner Lake treatment plant location. This fire destroyed five high value pieces of equipment, a large metal building, building contents and inventory items. There was also extensive smoke damage to one office building. As of the end of the year, the Utility had received \$500,000 from its insurance company and the receivable is the anticipated additional amount that will be paid by the insurance company for the replacement value of the destroyed property as well as expenses related to clean up.

The Utility increased its property value less depreciation by around \$3,300,000 during 2018. This increase was mainly due to construction in progress projects.

The Arkansas Natural Resources Commission approved loan funds from the Arkansas Clean Water State Revolving Loan Fund in the amount of \$30,000,000 on October 15, 2016. The interest rate is 1.25 percent with an annual servicing fee of 1.00 percent. The Utility will pay interest only on the loan funds received until April, 2021 at which time principal payments commence. At the end of December in 2018, the Utility had been disbursed the total amount of \$10,786,227 for this bond issue.

The Utility paid off two bond issues during 2018 which were with the Arkansas Natural Resources Commission. One was a \$7,000,000 issue and the other one was a \$4,000,000 issue. Both bond issues were dated in 1995 and repayment of principal started in 1998.

Overview of Annual Financial Report

Management's Discussion and Analysis (MD&A) serves as an introduction to, and should be read in conjunction with, the basic financial statements and supplementary information. The MD&A represents management's examination and analysis of the Utility's financial condition and performance.

The financial statements report information about the Utility using full accounting methods as utilized by similar business activities in the private sector. The financial statements include a statement of net position; statement of revenues, expenses and changes in net position; statement of cash flows; notes to the financial statements and other supporting schedules.

The statement of net position presents the financial position of the Utility on a full accrual historical cost basis. This statement presents information on all of the assets and liabilities with the difference reported as net position. Over time, increases and decreases in net assets are one indicator of whether the financial position is improving or deteriorating.

While the statement of net position provides information about the nature and amount of resources and obligations at year-end, the statement of revenues, expenses and changes in net position presents the results of the business activities over the course of the fiscal year and information as to how the net position changed during the year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the cash flows.

The statement of cash flows presents changes in cash and cash equivalents, resulting from operational, financing and investing activities. This statement presents cash receipt and disbursement information only.

The notes to the financial statements and supplementary information are provided to disclose information that is essential to a full understanding of the material data provided in the statements.

The financial statements were prepared by the Utility's staff from its detailed transactions for the years ending December 31, 2018 and 2017. The financial statements were audited and adjusted, if material, during the independent external audit process.

Financial Analysis

The comparative financial statements provide information about the financial activities of the North Little Rock Waste Water Utility. The following information is an analysis of the comparison between the two years presented in the financial statements. The amounts for the year ending December 31, 2016 are also shown for reference purposes.

Statement of Net Position:

This statement indicates that the Utility had an adequate amount of liquid assets as of the end of the year and a reasonable level of unrestricted net position. The increase in current assets is the result of a higher certificate of deposit and cash balance, as well as an insurance receivable which was not present in 2017. The increase in the property value is mainly due to the completion of projects during the year. The other non-current assets include the deferred outflow related to pension account, which increased from 2017 to 2018 by approximately \$415,700.

The increase in current liabilities is due to a higher balance in accounts payable at the end of 2018. Equipment in the amount of \$1,622,476 was received before the end of the year and a construction estimate in the amount of \$298,668 was also received. Both are included in accounts payable. The other non-current liability total amount for 2018 includes an amount of \$2,330,871 for the reserve for bio-solid removal. This reserve account was set up to accrue a liability for the cost of removing sludge from the lagoons at all of the treatment plants. The estimate for one of the lagoons was increased by \$1,535,650 in 2017, which was a higher increase than usual based on estimates received for sludge removal services. The Utility removed sludge from two of its treatment plants during 2018 at a cost of \$861,509.

The current ratio is an indication of short-term liability and is calculated by dividing current assets by current liabilities. A resulting number greater than one indicates current assets in excess of current needs which can be applied to future periods. The current ratio as of December 31, 2018 was 3.15 and the ratio for 2017 and 2016 was 2.90 and 1.81, respectively. Another ratio which is shown on this statement is the debt utilization ratio which indicates what percentage the total debt is to total assets. This ratio is calculated by dividing total notes payable by total assets and deferred outflows of resources and was 31% for the year ended December 31, 2018. The debt utilization ratio for 2017 and 2016 was 32% and 31%, respectively.

Analysis of Statement of Net Position

	2018	2017	2016
Current Assets	\$ 17,144,171	\$ 11,361,147	\$ 7,588,493
Net Property & Equipment	\$ 117,665,611	\$ 114,351,953	\$ 108,421,949
Other Non-Current Assets	\$ 2,741,870	\$ 2,326,188	\$ 1,497,554
Current Liabilities	\$ 5,438,903	\$ 3,911,339	\$ 4,181,497
Bonds Payable	\$ 40,514,451	\$ 38,552,096	\$ 33,481,334
Other Non-Current Liabilities	\$ 6,116,099	\$ 6,740,914	\$ 4,323,313
Invested in Capital Assets, net of related debt	\$ 75,043,661	\$ 73,371,696	\$ 72,209,609
Restricted Net Assets	\$ 494,648	\$ 620,505	\$ 697,462
Unrestricted Net Assets	\$ 9,943,890	\$ 4,842,738	\$ 2,614,781

Statement of Revenues, Expenses and Changes in Net Position:

For the year ending December 31, 2018, the Utility had an operating income of \$6,344,119 with an overall increase in net position of \$6,647,260 after the non-operating income and expenses were accounted for.

Analysis of Statement of Revenues, Expenses and Changes in Net Position

	2018	2017	2016
Operating Revenue	\$ 22,091,555	\$ 20,619,957	\$ 18,557,149
Operating Expenses	\$ (15,747,436)	\$ (16,562,127)	\$ (14,840,777)
Operating Income	\$ 6,344,119	\$ 4,057,830	\$ 3,716,372
Non-Operating Revenue	\$ 1,273,454	\$ 206,258	\$ 381,615
Non-Operating Expenses	\$ (970,313)	\$ (951,001)	\$ (866,364)
Increase in Net Position	\$ 6,647,260	\$ 3,313,087	\$ 3,231,623

Of the total operating revenue for 2018, 95% comes from the rates that the customer base pays for their sewer service. The utilities customer base did increase in 2016 due to the addition of the Maumelle service area.

The operating revenue besides that amount directly from the customer base includes late fees collected on past due billings, tie-on and permit fees, a treatment fee accessed to another city per a court order agreement and plan review charges. The operating revenue increase between 2018 and 2017 is due to the rate change which was effective with the February 2018 billings. There was also a rate increase between 2017 and 2016.

The total operating expense is comprised of labor, deprecation and other. The labor cost includes benefits (insurance, training, matching FICA, and pension) as well as salary. The other operating expenses include supplies, utilities, routine repair and maintenance, outside services and any other non-labor or depreciation expense. The decrease in operating expenses between 2018 and 2017 is mainly due to the recording of a larger adjustment for the bio-solid removal in 2017.

The non-operating revenue increase for 2018 is due to the gain on property disposals being recorded for the assets which were destroyed by the fire. The replacement value received was greater than the book value of the assets by the amount of \$980,681. The non-operating revenue decrease between 2017 and 2016 was due to a lower amount of donated property being recorded.

The increase in non-operating expense for 2018 and 2017 is due to more projects being completed which were funded by loans, thus a higher interest expense was recorded.

Capital Asset Information:

As of December 31, 2018, the Utility had a property value after accumulated depreciation of \$117,665,611. This amount includes construction in progress as well as fixed assets. Some of the increase in the property value before depreciation is listed below:

Various Construction in Progress Jobs-Completed	\$ 1	10,826,611
Various Construction in Progress Jobs-In Progress	\$	5,468,899
Transportation Equipment	\$	2,169,962
Various Pump Replacements	\$	227,233

The construction in progress jobs included various projects for lining and pipe bursting of sewer lines, an interceptor line going to the White Oak Treatment Plant, a pump station replacement project and a pump station generator project. The capital asset additions were funded with both bond proceeds and reserves. An amount of \$1,868,123 in property value was disposed of during the year. Some items were sold, some were removed due to replacement and some were removed due to being destroyed by the fire mentioned earlier.

Debt Information:

The following schedule shows the debt activity for the year.

SCHEDULE OF BONDS PAYABLE DECEMBER 31, 2018

		1/1/2018		DRAWS				12/31/18
DESCRIPTION	В	BALANCE	F	RECEIVED	PA	AYMENTS		BALANCE
SERIES "A"	\$	240,573.98			\$	240,573.98	\$	-
SERIES "B"	\$	137,504.01			\$	137,504.01	\$	-
SERIES 2001	\$	3,978,220.61			\$	559,108.06	\$	3,419,112.55
SERIES 2008	\$	10,569,828.74			\$	628,359.14	\$	9,941,469.60
SERIES 2012	\$	19,337,755.00			\$	862,614.28	\$	18,475,140.72
SERIES 2016	\$	6,716,374.00	\$	4,069,853.00	\$		\$	10,786,227.00
	\$40	0,980,256.34	\$	4,069,853.00	\$ 2	,428,159.47	\$4	2,621,949.87

The payments recorded for the revolving loan funds were the scheduled six-month payments. The Series "A" and Series "B" loans were paid off in April, 2018. The Series 2001 loan will be paid off in April, 2024. The Series 2008 loan will be paid off in October, 2031. The Series 2012 loan will be paid off in October, 2035. The Series 2016 loan was issued in October of 2015 for an amount of \$30,000,000. Interest only payments will be made until April, 2021 at which time principal payments will commence until October, 2040.

Budget to Actual Comparison:

The schedule on page 33 shows a comparison between what the Utility budgeted for 2018 and the actual amounts for the year. The budget is prepared by the Utility's Financial Administrator and is based on the previous year's dollar amounts. The previous years' amounts are adjusted to reflect the projected activity for the current year. As with any budget, there were differences with the actual amounts recorded for the year.

The total operating revenue was 4.0 percent higher than the amount budgeted. There was a higher amount of industry regular charges and violation charges recorded than budgeted. There were also some tie-on charges recorded which was not budgeted for. Tie on charges depend on developer activity and cannot be estimated for budget purposes.

The total operating expenses were about 9.0 percent less than the amount which was budgeted. The budget included the amount of \$1,000,000 for emergency repairs and none were recorded in 2018. The budget also included \$142,000 for the development of a computerized maintenance management system which was not done.

The actual non-operating revenue amount is higher than the amount budgeted due to the gain on property disposed of amount. Such an amount is not budgeted for.

The actual non-operating expenses were lower than the amount budgeted due to some interest expense being capitalized into the cost of the projects for a longer period of time than anticipated.

Analysis of Planned Activity for 2019:

There are a number of lining, pipe bursting and open cut projects planned for various locations within the service area. These projects will increase the life of various sized sewer lines and will be funded through the Series 2016 loan. There will also be a contract for another Sewer System Evaluation Survey which will be paid out of general revenue. Also, engineering will continue for the Maumelle to White Oak diversion and will also be paid out of general revenue. The Utility's plan is to divert the flow from the Maumelle service area to the White Oak Treatment Plant and decommission the current Maumelle Treatment Plant.

Contacting the Management:

The financial report is designed to provide our customers, citizens and creditors with a general overview of the Utility's finances and to show the accountability for the money it receives. If you have any questions about this report or need additional financial information, contact our administration office.

1. Summary of Significant Accounting Policies

Principles of Operation

The North Little Rock Waste Water Utility (the "Utility") (a component unit of the City of North Little Rock) is financed and operated in a manner similar to private business enterprises, where the intent of the governing body is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. The financial statements present only the North Little Rock Waste Water Utility and do not purport to, and do not, present fairly the financial position of the City of North Little Rock, Arkansas, as of December 31, 2018 and 2017, the changes in its financial position, or, where applicable, its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis of Accounting

The Utility follows Government Accounting Standards Board ("GASB") Statement No. 62, Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements, which incorporates Financial Accounting Standards Board ("FASB") pronouncements and Accounting Principles Board ("APB") opinions issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements, in which case, GASB prevails. Preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of management's estimates. Actual results may differ from estimates.

The Utility uses the economic resources measurement focus and accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred regardless of the related cash flows. The Utility distinguishes operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses for the proprietary funds include the cost of personnel, supplies, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Accounts Receivable

Sales of sewer services are made on open account to customers located in North Little Rock, Arkansas and surrounding areas. The Utility utilizes the allowance method of accounting for uncollectible accounts receivable. The Utility reviews its customer accounts on a periodic basis and records a reserve for specific amounts that management determines may not be collected. In addition, the Utility has established a general reserve for potential uncollectible accounts based on historical bad debts. Amounts are written off at the point when collection attempts have been exhausted, which is usually 120 days after the account is past due. Management uses significant judgment in estimating uncollectible amounts. In estimating uncollectible amounts, management considers factors such as current overall economic conditions, industry-specific economic conditions, historical customer performance and anticipated customer performance. While management believes the Utility's processes effectively address its exposure to doubtful accounts, changes in economic, industry or specific customer conditions may require adjustment to the allowance recorded by the Utility. Accounts receivable are net of an allowance for doubtful accounts of \$10,000 at both December 31, 2018 and 2017.

<u>Inventory</u>

Inventory consists of materials and supplies valued at the lower of cost or market, using the first-in, first-out method.

1. Summary of Significant Accounting Policies (continued)

Property, Plant and Equipment

Property, plant and equipment are stated at cost unless otherwise noted. Depreciation is provided by the straight-line method over the estimated useful lives of the related assets ranging from three to fifty years. Assets are constructed and acquired by four methods: utility work crews, independent contractors financed by utility funds, contributions to the utility by independently financed waste water improvement districts, and contributions to the utility by real estate developers in conjunction with a property development. Assets acquired from improvement districts and real estate developers result in donated capital and have been so classified. Donated fixed assets are valued at their estimated fair market value on the date donated. Interest costs are capitalized when incurred on debt where proceeds were used to finance the construction of assets. The Utility capitalizes all purchases over \$1,000 that have at least a three year useful life. Costs of repairs and maintenance that do not improve or extend the assets lives are charged to expense as incurred.

Restricted Assets

The Utility restricts certain assets for the payment of debt service, capital improvements, and repairs and maintenance of the Utility.

Net Position

Net position comprises the various net earnings from operating income, non-operating revenues and expenses, and capital contributions. Net position is classified in the following three components:

Net investment in capital assets

This component of net position consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes or other borrowings that are attributable to the acquisition, construction or improvement of those assets. If there are significant unspent related debt proceeds at year-end, the portion of the debt attributable to the unspent proceeds is not included in the calculation of net investment in capital assets. Rather, that portion of the debt is included in the same net position component as the unspent proceeds.

Restricted for debt service

This component of net position consists of constraints imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation. When an expense is incurred for purposes for which there are both restricted and unrestricted net position available, it is the Utility's policy to apply those expenses to restricted net position to the extent such are available and then to unrestricted net position.

Unrestricted

This component of net positon consists of net assets that do not meet the definition of "net investment in capital assets" or "restricted."

Accrued Absences

Each employee may accumulate a maximum of thirty days of vacation and sixty days of sick leave. The Utility has accrued a liability for vacation and sick leave pay, which has been earned but not taken by employees.

1. Summary of Significant Accounting Policies (continued)

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Utility considers certificates of deposits and all highly liquid cash investments with original maturities of three months or less to be cash equivalents.

Reserve for Bio-Solids Disposal

The Utility provides annually for the estimated cost of bio-solids removal from the treatment plant lagoons, which occurs every five to fifteen years for each lagoon.

Budgets and Budgetary Accounting

Budgeted revenues and expenses are prepared using the economic resources measurement focus and the accrual basis of accounting. The original budgets adopted by the Utility were not amended during the years ended December 31, 2018 and 2017.

Deferred Outflows/Inflows of Resources

Deferred outflows and inflows of resources are financial statement elements distinct from assets and liabilities and represent a consumption or production of net position that applies to future period and so will not be recognized as an outflow or inflow of resources until then. The Utility's deferred outflows and inflows of resources consist of deferred outflows/inflows of resources related to the Utility's pension plan activities, as further discussed in Note 6.

Recently Adopted Accounting Standards

GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other than Pensions, addresses accounting and financial reporting by state and local governments that provide postemployment benefits other than pensions (OPEB) to their employees and for state and local governments that finance OPEB for employees of other governments. This statement supersedes the requirements in GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pension Plans, and GASB Statement No. 57 OPEB, Measurements by Agent Employers and Agent Multiple-Employer Plans. This statement requires state and local governments to report a liability on the face of the financial statements for the OPEB as well as related deferred outflows of resources, deferred inflows of resources, and expense/expenditures. The adoption of Statement No. 75 resulted in an increase to the OPEB obligation of \$39,943. Note disclosures and Required Supplementary Information (RSI) were incorporated to comply with Statement No. 75.

GASB Statement No. 82, Pension Issues – an amendment of GASB Statements No. 67, No. 68, and No. 73, addresses certain issues that have been raised with respect to Statements No. 67, Financial Reporting for Pension Plans, No. 68, Accounting and Financial Reporting for Pensions, and No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not Within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68. The statement addresses issues regarding (1) the presentation of payroll-related measures in required supplementary information, (2) the selection of assumptions and the treatment of deviations from the guidance in an Actuarial Standard for Practice for financial reporting purposes and (3) the classification of payments made by employees to satisfy employee (plan member) contribution requirements. GASB Statement No. 82 had no impact on the Utility's financial statements. Note disclosures and RSI were incorporated to comply with Statement No. 82.

1. Summary of Significant Accounting Policies (continued)

Recently Issued Accounting Standards

GASB Statement No. 87, *Leases*, provides a new framework for accounting for leases under the principle that leases are financings. No longer will leases be classified between capital and operating. Lessees will recognize an intangible asset and a corresponding liability. The liability will be based on the payments expected to be paid over the lease term, which includes an evaluation of the likelihood of exercising renewal or termination options in the lease. Lessors will recognize a lease receivable and related deferred inflow of resources. Lessors will not derecognize the underlying asset. An exception to the general model is provided for short-term leases that cannot last more than 12 months. Contracts that contain lease and nonlease components will need to be separated so each component is accounted for accordingly. This standard becomes effective for the Utility in fiscal year 2020. Management of the Utility has not yet determined the impact that adoption of this statement will have on the Utility's financial statements or related disclosures.

GASB Statement No. 88, Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements, provides guidance on debt information that is to be disclosed in the notes to governmental financial statements. The statement clarifies which liabilities are to be included in the disclosures and requires additional information to be disclosed. In addition, the statement requires information about debt incurred through direct borrowings or direct placements to be disclosed separately from other debt. The standard becomes effective for the Utility in fiscal year 2019. Management of the Utility has not yet determined the impact that adoption of the statement will have on the Utility's financial statements or related disclosures.

GASB Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period, established accounting requirements for interest cost incurred before the end of a construction period. The statement requires such interest cost be recognized as an expense in the period in which the cost is incurred in financial statements prepared using the economic resources measurement focus. Currently, GASB Statement No. 62 requires some interest costs to be included in the historical cost of a capital asset reported in an enterprise fund or business-type activity. When effective, this statement will no longer require interest cost to be included in historical cost. This standard becomes effective for the Utility in fiscal year 2020. Management of the Utility has not yet determined the impact that adoption of this statement will have on the Utility's financial statements or related disclosures.

2. <u>Description of Funds</u>

The Utility complies with all state and local laws and regulations as well as the provisions of certain contracts requiring the use of separate funds. The required funds used by the Utility include the following:

Sewer Fund

The Sewer Fund was established for the purpose of depositing all revenues derived from the operation of the system. Revenues are restricted to the payment of reasonable and necessary expenses of operation and maintenance of the system, payment of principal, interest and trustee's fees on bonds, reserve for contingencies, and providing for a depreciation fund.

Operating and Maintenance Fund

The Operating and Maintenance Fund is used to pay the reasonable and necessary monthly expenses of operation, and repair and maintenance of the Utility. The fund is maintained by required monthly transfers from the Sewer Fund.

2. Description of Funds (continued)

Sewer Depreciation Fund

The Sewer Depreciation Fund is restricted to paying the costs of needed capital improvements or replacements; provided, however, that monies in the Sewer Depreciation Fund may be used to the extent necessary to prevent a default in the payment of the principal and interest on bonds as they become due. The fund is maintained by required monthly transfers from the Sewer Fund.

Series A Revolving Loan Fund

The Series A Revolving Loan Fund was established in 1995 and is restricted to the recording of activity in connection with the Series A Revolving Loan Fund. Matured during the year ended December 31, 2018.

Series B Revolving Loan Fund

The Series B Revolving Loan Fund was established in 1995 and is restricted to the recording of activity in connection with the Series B Revolving Loan Fund. Matured during the year ended December 31, 2018.

Rehabilitation Fund

The Rehabilitation Fund was established in 2007 by city ordinance #7973 (as amended by city ordinance #8083) to provide for system repairs and replacements from the proceeds of 2007 rate increases. The ordinance requires that a monthly transfer of \$41,667 (\$500,000 annually) be made from the Sewer Fund to provide for repairs and replacements.

2001 Revolving Loan Fund

The 2001 Revolving Loan Fund was established in 2001 and is restricted to the recording of activity in connection with the 2001 Revolving Loan Fund.

2008 Revolving Loan Fund

The 2008 Revolving Loan Fund was established in 2008 and is restricted to the recording of activity in connection with the 2008 Revolving Loan Fund.

2012 Revolving Loan Fund

The 2012 Revolving Loan Fund was established in 2012 and is restricted to the recording of activity in connection with the 2012 Revolving Loan Fund.

2016 Revolving Loan Fund

The 2016 Revolving Loan Fund was established in 2016 and is restricted to the recording of activity in connection with the 2016 Revolving Loan Fund.

3. Cash and Certificates of Deposit

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. In accordance with its investment policy, the Utility manages its exposure to declines in fair values by limiting investments to securities with a maturity of not more than five years from the date of purchase.

Credit risk is the risk that the issuer of counterparty will not fulfill its obligations. To minimize exposure to credit risk, the Utility's investment policy specifies the types of securities in which the Utility may invest.

3. Cash and Certificates of Deposit (continued)

Custodial credit risk is the risk that in the event of a bank failure, deposits may not be returned to the Utility. At December 31, 2018 and 2017, the Utility's deposits with two financial institutions were fully insured or collateralized and totaled \$12,888,810 and \$8,226,080, respectively.

4. Property, Plant and Equipment

Property, plant and equipment consisted of the following at December 31:

	2017	Additions	Transfers	Disposals	2018
Land	\$ 3,139,809	-	-	-	3,139,809
Plant and equipment	170,560,341	2,588,319	10,826,611	(1,868,123)	182,107,148

process	10,785,876	5,509,634	(10,826,611)		5,468,899
	184,486,026	8,097,953	-	(1,868,123)	190,715,856
Less accumulated					
depreciation	(70,134,073)	(4,255,094)	-	1,338,922	(73,050,245)
	\$ 114,351,953	3,842,859	-	(529,201)	117,665,611
	2016	Additions	Transfers	Disposals	2017
Land	\$ 3,139,809	-	-	-	3,139,809
Plant and equipment	167,315,381	1,289,305	2,224,423	(268,768)	170,560,341
Construction in					
process	4,297,155	8,713,144	(2,224,423)	-	10,785,876
	174,752,345	10,002,449	-	(268,768)	184,486,026
Less accumulated					
depreciation	(66,330,396)	(4,020,405)		216,728	(70,134,073)
	\$ 108,421,949	5,982,044	-	(52,040)	114,351,953

The Utility experienced a fire during the year ended December 31, 2018, resulting in the loss of equipment with a net book value of \$449,319 and damage to a building and equipment resulting in repairs totaling \$216,219. See note 13 for information on insurance proceeds.

5. <u>Long-Term Debt</u>

The Utility received two program awards totaling \$11,000,000 in 1995 available for approved construction with interest and financing fee only payments semi-annually until October 15, 2000. The interest rate on the 1995 revolving loan fund loans is at 2.5% and the financing fee is 1% of outstanding principal. Repayment of the 1995 loan began in October of 1998 with payments to be made semi-annually over twenty years, including interest. These matured and were repaid in full during the year ended December 31, 2018.

5. <u>Long-Term Debt (continued)</u>

In 2001, the Utility received a \$10,000,000 program award available for approved construction. The interest rate on the 2001 revolving loan fund is at 2.25% and a financing fee at 1% of the outstanding principal. Repayment of principal, interest and financing fee of the 2001 loan began in October 2005 with payments to be made semi-annually over twenty years.

In 2008, the Utility received a \$14,000,000 program award available for approved construction. The interest rate on the 2008 revolving loan fund is at 1.75% and a financing fee at 1% of the outstanding principal with semi-annual payments of interest and financing fee during the project construction period. Repayment of principal, interest and financing fee of the 2008 loan began in April 2012 with payments to be made semi-annually over twenty years.

In 2012, the Utility received a \$21,000,000 program award available for approved construction. The interest rate on the 2012 revolving loan fund is at 1.5% and a financing fee at 1% of the outstanding principal with semi-annual payments of interest and financing fee during the project construction period. Repayment of principal, interest and financing fee of the 2012 loan will begin in April 2016 with payments to be made semi-annually over twenty years.

In 2016, the Utility received a \$30,000,000 program award available for approved construction. The interest rate on the 2016 revolving loan fund is at 1.25% and a financing fee at 1% of the outstanding principal with semi-annual payments of interest and financing fee during the project construction period. Repayment of principal, interest and financing fee of the 2016 loan will begin in April 2021 with payments to be made semi-annually over twenty years. As of December 31, 2018, \$19,213,785 was left to be drawn on this loan.

In 2016, the Maumelle Wastewater was merged into the Utility. As a result, the Utility assumed \$2,051,808 in long-term debt, which was paid in full at the time of closing.

The following is a summary of the bonds payable activity at December 31:

	,	2017	Additions	Retirements	2018
Bonds payable	\$	40,980,257	4,069,853	(2,428,160)	42,621,950
		2016	Additions	Retirements	2017
Bonds payable	\$	36,212,340	7,498,920	(2,731,003)	40,980,257

5. <u>Long-Term Debt (continued)</u>

Aggregate payments of the revolving loan fund balance outstanding are as follows for the years ending December 31:

		2001	200	8	20	12	20	16	T	otal
Principal:										
2019	\$	577,427	645	,759	88	4,313		-	2,1	07,499

6. Pension Plan

Plan Description

North Little Rock Waste Water Utility Defined Pension Plan (the "Plan") is a single-employer sponsored plan administered by North Little Rock Waste Water Utility (the "Utility"). The Plan provides retirement, death and disability benefits to plan members and beneficiaries. The Utility's Board of Commissioners establishes benefit provisions and all other requirements. The Plan does not issue stand-alone financial statements, nor is it included in another public employee retirement system plan's financial statements. Participants are not required to contribute to the plan.

6. Pension Plan (continued)

Benefits Provided

The Plan provides retirement, disability, and death benefits to plan members and their beneficiaries. Retirement benefits are based on 2% of average annual compensation for the last five years of employment multiplied by the employee's years of credited service up to 30 years. Employees are fully vested after five years. Employees eligible for retirement benefits after attaining 65 years of age with five years of credited service and are eligible for early retirement after attaining age 55 with ten years of credited services. The Utility is required to contribute to the Plan at an actuarially determined rate.

The Plan does not provide for automatic cost of living adjustments (COLA) although the plan sponsor may make changes. The plan has not given a retiree increase.

As of the measurement date on July 1, 2018, the Plan had 82 active employees, 29 inactive employees entitled to, but not yet receiving benefits and 42 inactive employees or beneficiaries currently receiving benefits. As of July 1, 2017, the Plan had 80 active employees, 29 inactive employees entitled to, but not yet receiving benefits and 42 inactive employees or beneficiaries currently receiving benefits.

Contributions

Actuarially determined contributions are determined based on actuarial calculations performed by an independent actuary. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Contributions are based on the employee's annual covered salary. The Utility's contribution rate and actuarially determined contribution for the years ended December 31, 2018 and 2017, were 16.5 and 19.1 percent and \$693,500 and \$702,970, respectively. Actual contributions for the years ended December 31, 2018 and 2017, equaled \$1,353,100 and \$702,970, or 195.0 and 100.0 percent of required contributions, respectively.

Net Pension Liability

The Utility's net pension liability was measured as of June 30, 2018 and 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability in the actuarial valuation was determined using the following actuarial assumptions, as of June 30:

	2010	<u>=017</u>
Inflation	3.0%	3.0%
Salary increases	3.5%, including inflation	3.5%, including inflation
Investment rate of return	6.5%, net of Plan investment	6.5%, net of Plan investment
	expense, including inflation	expense, including inflation

2018

2017

6. Pension Plan (continued)

The actuarial assumptions used in the June 30, 2018 and 2017, valuation were based on a review of actuarial assumptions completed during the June 30, 2018 and 2017. The assumptions used were as follows:

Cost Method: The "entry age normal cost method" has been used in determining

retirement cost. The method used for the July 1, 2013, and previous

valuations was the aggregate funding method.

Amortization Method: The entry age normal cost method also requires an amortization method to

be used in calculating the range of recommended contributions. The Unfunded Liabilities are amortized on a level of percentage of salary

method and a range of 10 to 20 years is shown.

Pre-Retirement Mortality: RP 2000 table.
Post-Retirement Mortality: RP 2000 table.

The mortality table used for the July 1, 2013, and previous valuation was

the Unisex Pensioner 1984 table (UP84).

Mortality Projection: Future mortality improvements were not considered in developing the

suggested contribution for this report. The liabilities are significantly more volatile with regards to the other assumptions (i.e., investment return,

retirement age, and turnover) than with mortality improvement.

Voluntary Terminations: T-2 table.

Expected Retirement Pattern: Retirement was assumed to occur on the Normal Retirement Date.

Assumed Investment Return: 6.50% beginning with July 1, 2017 (7.50% for prior years).

Salary Growth: 3.50% annually (4.50% for prior years).

The long-term expected rate of return on Plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of Plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

6. Pension Plan (continued)

The target allocation and best estimates of arithmetic real rates of return for each major asset class as both of December 31, 2018 and 2017, are summarized in the following table:

2018

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity	49%	4.50%
Fixed Income	30%	1.75%
Real estate	10%	4.25%
Foreign equity	6%	6.25%
Cash	5%	0.00%
Total	100%	

2017

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equities	49%	4.50%
International equities	6%	6.25%
Fixed income	30%	1.75%
Real estate	10%	4.25%
Cash	5%	0.00%
Total	100%	

Discount Rate

The discount rate used to measure the total pension liability was 6.5 at December 31, 2018, and 2017. The projection of cash flows used to determine the discount rate assumed that contributions from the employer will be at least the actuarially determined contribution based on past contributions. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

6. Pension Plan (continued)

Changes in Net Pension Liability

Changes in the net pension liability for the year ended December 31, 2018, were as follows:

	Total Pension		Total Fiduciary Net		
		Liability	Position	Net Pension Liability	
Balance, July 1, 2017	\$	13,669,600	10,883,507	2,786,093

6. Pension Plan (continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability calculated using the discount rate of 6.5 and 7.5 percent for the year ended December 31, 2018 and 2017, respectively. Furthermore, the following represent the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	D	ecember 31, 20	018	D	December 31, 2017			
		Total		Total				
	Discount Pension Net Pension		Discount	Pension	Net Pension			
	Rate	Liability	Liability	Rate	Liability	Liability		
1% decrease	5.50%	\$15,916,481	4,305,057	5.50%	\$15,235,100	4,351,593		
Current discount rate	6.50%	14,297,295	2,685,571	6.50%	13,669,600	2,786,093		
1% increase	7.50%	12,906,798	1,295,374	7.50%	12,325,057	1,441,550		

Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources

For the year ended December 31, 2018 and 2017, the Utility recognized pension expense of \$707,595 and \$639,165, respectively.

At December 31, 2018 and 2017, the deferred outflows and inflows of resources were as follows:

		Deferred	Deferred
		Outflows of Resources	Inflows of Resources
2018	-	resources	Resources
Differences between expected and actual experience	\$	60,868	752,527
Changes of assumptions		801,218	-
Net difference between projected and			
actual earnings on Plan investments		350,629	61,450
		1,212,715	813,977
Employer contributions subsequent to measurement		1,353,100	-
Total	\$	2,565,815	813,977
2017			
Differences between expected and actual experience	\$	74,395	861,345
Changes of assumptions		946,894	-
Net difference between projected and			
actual earnings on Plan investments		425,874	81,933
	-	1,447,163	943,278
Employer contributions subsequent to measurement		702,970	
Total	\$	2,150,133	\$ 943,278

6. Pension Plan (continued)

Employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability during the year ended December 31, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (benefit) during the year ending December 31:

2019	\$ 174,904
2020	52,667
2021	(7,801)
2022	65,108
2023	83,900
Thereafter	29,960
	\$ 398,738

Components of Net Pension Liability

The components of the net pension liability at June 30, 2018, were as follows:

	 2018	 2017
Total pension liability	\$ 14,297,295	\$ 13,669,600
Plan's fiduciary net position	 11,611,424	 10,883,507
Net pension liability	\$ 2,685,871	\$ 2,786,093
Plan fiduciary net position as a		
percentage of total pension liability	81.21%	79.62%

7. Post-employment Benefits Other Than Pensions (OPEB)

GASB requires that employers providing post-employment benefits other than pensions record and disclose annual other post-employment benefit ("OPEB") cost and a net OPEB liability in their financial statements and disclose other information about their OPEB plans, including the unfunded actuarial liability.

Plan Description

The Utility's defined benefit OPEB plan (the "OPEB plan") provides OPEB for Utility employees resulting from Arkansas statutes which provide that any municipal official or employee vested in any retirement plan that has 20 years of service and attains 55 years of age may continue to participate in the Utility's healthcare plan after retirement provided that they pay 100% of the group premium. The OPEB plan is a single-employer defined benefit OPEB plan is administered by the Utility. Standalone financial statements are not issued for the OPEB Plan.

7. Post-employment Benefits Other Than Pensions (OPEB) (continued)

Benefits Provided

The OPEB plan provides medical, pharmacy, dental, and vision insurance to participants after retirement provided that they pay 100% of the group premium.

As the measurement date of December 31, 2018, the Plan had 85 active employees with no inactive employees entitled to, but not yet receiving benefits and no inactive employees or beneficiaries currently receiving benefits.

Annual OPEB Cost and Net OPEB Liability

The Utility's annual OPEB cost and liability is calculated using the Entry Age Normal Actuarial Cost Method as required by GASB 75. The Actuarially Determined Contribution and the Amortization Payment are not applicable due to the plan not being prefunded. The Utility recognizes a liability due to the implicit subsidy rate that is inherent of retiree healthcare costs by active employee healthcare costs when healthcare premiums paid by retirees and active employees are the same.

As of both December 31, 2018 and 2017, the actuarial accrued liability for benefits was \$285,680 and \$170,593, respectively, all of which was unfunded. The covered payroll (annual payroll of active employees covered by the plan) for the year ended December 31, 2018 and 2017, was \$4,051,934 and \$4,312,328, respectively, and the ratio of the unfunded actuarial accrued liability to the covered payroll was 7.05% and 3.96%, respectively. The actuarial assumptions included a 3.64% investment rate of return and projected annual salary increases of 2.8%.

Health Insurance Premiums

Health insurance premiums are paid monthly and are the same for both pre-age 65 and ages 65 or older. Benefits pay secondary to medicare. For the year ended December 31, 2018, annual retiree health insurance premiums were \$5,376 for a single coverage and \$11,910 for family coverage.

Healthcare Cost Trend Rate

The cost trend numbers used in the analysis were developed consistent with the Getzen model promulgated by the Society of Actuaries for use in long-term trend projection The ACA excise tax will ultimately affect all plans. Due to the variability of the ACA excise tax by plan, the user needs to estimate the impact and adjust the trend. The excise tax could raise the average annual trend rate by 0.5% or more in each year.

Actuarial Cost Methods and Assumptions

The projection of future benefit payments for an ongoing plan involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

7. <u>Post-employment Benefits Other Than Pensions (OPEB) (continued)</u>

The following represent the key actuarial assumptions:

Age Adjustment Factor: 2.085998

Average Retirement Age: 63

Employer Future Premium

Remain a level % of the total cost over time

Contribution:

Actuarial Cost Method: Entry Age Normal

Amortization Method: Level Percentage of Payroll

Assets Backing OPEB Liability: \$0

Plan Asset Return: 0.000%
Bond Yield: 3.640%
Discount Rate: 3.640%
Measurement Date: 12/31/2018
Prior Measurement Date: 12/31/2017

Prior Year Discount Rate: 4.000% Projected Salary Increases: 2.80%

Amortization Period: 20 years, if applicable

Percentage Participation: 6.00%

Healthcare Cost Trend: Healthcare costs are expected to increase annually 4.6% to 4.8% for

medical, 4.7% to 7.6% for pharmacy, 3.0% to 3.5% for dental and 3.0%

for vision.

NOL and ADC: Calculated using the Alternative Measurement Method in accordance

with GASB methodology.

Mortality Table: RP2000 Mortality Table for Males and Females Projected 18 years; this

assumption does not include a margin for future improvements in

longevity.

Turnover Assumption: Derived from data maintained by the U.S. Office of Personnel

Management regarding the most recent experience of employee group

covered by the Federal Employees Retirement System.

NOL and ADC: Calculated using the Alternative Measurement Method in accordance

with GASB methodology.

Mortality Table: RP2000 Mortality Table for Males and Females Projected 18 years; this

assumption does not include a margin for future improvements in

longevity.

7. Post-employment Benefits Other Than Pensions (OPEB) (continued)

Turnover Assumption: Derived from data maintained by the U.S. Office of Personnel

Management regarding the most recent experience of employee group

covered by the Federal Employees Retirement System.

Changes in Net OPEB Liability

Changes in the net pension liability were as follows:

			Total Fiduciary Net	
	Total OPEB Liability		Position	Net OPEB Liability
		2018		
Balance, January 1, 2018	\$	170,593	-	170,593

Interest on OPEB liability		5,951	-	5,951
Net changes		20,404		20,404
Balance, December 31, 2017	\$	170,593		170,593

Sensitivity of the OPEB to Changes in the Discount Rate and Healthcare Trend Rate

The following presents the OPEB liability calculated using the discount rate of 2.64 and 4.64 percent for the year ended December 31, 2018. Furthermore, the following represent the net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	Discount Rate	t OPEB	Changes from Baseline
1% decrease	2.64%	\$ 347,872	62,192
Current discount rate	3.64%	285,680	-
1% increase	4.64%	237,540	(48,140)

7. Post-employment Benefits Other Than Pensions (OPEB) (continued)

The following presents the OPEB liability calculated using the healthcare trend rates 1 percent lower or 1 percent higher than the current rate:

	Baseline Trend - 1%	Baseline Trend	Baseline Tend + 1%
Net OPEB Liability	\$231,409	\$285,680	\$356,738
Change from Baseline	(\$54,271)	\$0	\$71,058

8. Average Number of Sewer Users

The average number of residential, commercial, and industrial customers for the year ended December 31, 2018, was 36,512; 3,553; and 19, respectively. The average number of residential, commercial, and industrial customers for the year ended December 31, 2017, was 36,234; 3,543; and 18, respectively.

9. Insurance Coverage

The Utility was insured at December 31, 2018 and 2017, for general liability, automobile liability and all risk replacement cost except worker's compensation with the Arkansas Public Entities Risk Management Association with claims administered by Gallagher Bassett Insurance Services of Little Rock. The Utility was insured with the Municipal League Workers' Compensation Trust for worker's compensation. The policy effective dates are for a calendar year for all aforementioned insurance policies. The Utility was insured at December 31, 2018 and 2017, with RSUI Indemnity Co. for blanket property coverage.

The following schedule lists the coverage and limits:

	Type of Insurance	<u>Limits</u>
1.	General liability	
	a. General aggregate	\$350,000 per member/per policy period
	b. General liability	\$350,000 each occurrence, bodily injury and property damage
	c. Medical expenses	\$5,000 per person/\$25,000 each occurrence loss
2.	Automobile liability	\$100,000 each occurrence, bodily injury and property damage
3.	All risk replacement cost	\$100,000,000
4.	Blanket property coverage	
	a. Earthquake coverage	\$100,000,000
	b. Flood coverage	\$100,000,000

10. Current Sewer Rates

The current sewer rates were established by Ordinance No. 8768 by the City Council of the City of North Little Rock on October 26, 2015. The classes of users include residential, commercial, and significant industrial customers. The rates for each residential customer are computed based on the average monthly usage for the billing months of October, November, December, January, February and March. The rates for each commercial customer are computed based on the actual usage.

10. Current Sewer Rates (continued)

In the case of new residential customers for whom records are not available for the entire six-month period, the rates are computed on actual water usage until an average monthly usage can be calculated. The minimum monthly charge for the first four hundred cubic feet or less of the average monthly usage is a rate equal to \$17.01.

For each one hundred cubic feet, or fraction thereof, the monthly rate for residential, commercial and industrial customers is equal to \$4.88 per one hundred cubic feet charged with a minimum of \$17.01 per four hundred cubic feet for existing users. Existing users are defined as users physically located within the city limits of North Little Rock or when they are physically located within the now existing territorial boundaries of an improvement district that received services from the system on the date of the enactment of ordinance 8768. Any user not deemed to be an existing user shall be deemed to be an outside user, but will have the same monthly rate as an existing user.

Significant industrial customers are defined by the ordinance as any non-residential customer which normally discharges wastewater to the system in quantities of 25,000 gallons per day or greater or whose wastewater contains or has the potential to contain toxic pollutants, restricted pollutants, or non-compatible pollutants. The minimum monthly charge and additional monthly charge as stated above applies. In addition, penalties are assessed for biochemical oxygen demand, total suspended solids, ph, fats, oils and greases, and other limited parameters in excess of maximum limits established by the ordinance.

11. Total Annual Billable Water

The total annual billable water for the year ended December 31, 2018, was 3,903,275 one-hundred cubic feet, comprised of 2,452,354 one-hundred cubic feet annual billable water for residential customers and 1,450,921 one-hundred cubic feet annual billable water for commercial customers. The total annual billable water for the year ended December 31, 2017, was 3,872,689 one-hundred cubic feet comprised of 2,436,378 one-hundred cubic feet annual billable water for residential customers and 1,436,311 one-hundred cubic feet annual billable water for commercial customers.

12. Restricted Funds

The Utility has certain debt services funds with the Arkansas Development Finance Authority ("ADFA"), which are restricted to various uses. The Utility is required to deposit monthly with the ADFA, to be held in trust, an amount equal to 1/6 of the interest to become due on the next ensuing interest payment plus 1/6 of the next installment of principal next due on the Bonds. The required deposits shall be reduced by any amount in the Debt Service Fund available for meeting the purpose for which a deposit is required to be made. The total deposits, held in trust as of December 31, 2018 and 2017, were \$494,648 and \$620,505, respectively.

13. Contingency

The Utility was involved in a case that alleges the use by North Little Rock Waste Water customers of certain sewer lines located in the city limits of Sherwood. This use was considered to constitute a trespass and public nuisance. North Little Rock Waste Water Utility plans to vigorously defend its case. A favorable outcome is expected and no estimation of a loss or range of loss can be made at this time in the event of an unfavorable outcome.

13. Contingency (continued)

The Utility had a fire that damaged or destroyed buildings and equipment in 2018. Management has been working with contractors and obtaining bids for repairs and replacements through year end and subsequent to year end and a final determination has not been made on proceeds from the insurance claim. As of December 31, 2018, insurance had agreed to pay \$1,646,219 for the damages and loss of equipment known at that time. As of December 31, 2018, \$500,000 had been received.

Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

North Little Rock Waste Water Treatment Committee North Little Rock Waste Water Utility

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of North Little Rock Waste Water Utility as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise North Little Rock Waste Water Utility's basic financial statements, and have issued our report thereon dated March 30, 2019.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered North Little Rock Waste Water Utility's internal control over financial reporting ("internal control") to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of North Little Rock Waste Water Utility's internal control. Accordingly, we do not express an opinion on the effectiveness of North Little Rock Waste Water Utility's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether North Little Rock Waste Water Utility's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do

not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
